   5.5 AcuCT Hinged - Compact 333mV Hinged CTs 32
Accuenergy (Canada) Inc. specializes in power metering solutions that lead the industry in revenue grade energy metering, power quality analysis, ease of deployment and advanced communication methods. Our reliable power meters have been used across the globe to monitor electrical systems in commercial buildings, industrial facilities, data centres and cell towers for more than 18 years.

Our goal is to provide users with well designed products that are built to be easy to implement without sacrificing key functionality. Our pre-wired panel meters and wireless submeters were designed to offer the simplest tenant billing and metering solutions on the market, while providing ease of installation.
MASTER OF INTEGRATION

Highly configurable and designed for easy-integration in almost any metering application. The Acuvim II series offers a wide array of plug-in expansion modules for up to 15 different communication protocols.

KEY FEATURES

Four different models for Revenue Grade Metering, Data Logging, Time-of-Use and Power Quality.

Revenue grade ANSI C12.20 class 0.2 & IEC 62053-22 class 0.2s.

Built-in MODBUS RTU and DNP 3.0 protocols via RS485 port.

Plug-in modules for BACNET, Ethernet, Profibus.

Optional data logging, time-of-use and power quality monitoring.

Choose panel mount meter with display or DIN rail mount transducer with optional remote display.

Multifunction meter in NEMA 3 housing with three line backlit graphical LCD display.

Optional DIN rail mount transducer form factor for system integration

ACCUENERGY.COM/ACUVIM-II
DATA LOGGING
Acuvim IIR adds data logging capability of historical data for trending, analysis and reports and tenant metering plus threshold alarms and remote monitoring.

TIME-OF-USE
Acuvim IIE adds flexible time-of-use for industrial/commercial customers with complex time-based or tier-based rate structures.

POWER QUALITY MONITORING
The Acuvim IIW adds harmonic analysis and advanced power quality event logging with waveform capture and event logging.

ECONOMICAL SUB METERING

This economical series of meters offers quality and performance typically found in meters many times it’s price. The Acuvim-L series are versatile electrical meters for panel/device monitoring of three phase AC systems.

ACCUENERGY.COM/ACUVIM-L

KEY FEATURES

Six different models for different applications including Time-of-Use, kWh metering, and MODBUS integration.

NEMA 4 rated tough design.

3-Line LCD display with backlight.

Multiple current transformer options.

Industry leading 5 year warranty.

Built-in MODBUS RTU (some models)

Optional DIN rail mount transducer (some models)

Built-in power supply for easier, faster installation.

Revenue grade ANSI C12.20 class 0.5 & IEC 62053-22 class 0.5s.
MODBUS INTEGRATION
Acuvim-L series meters are offered with built-in Modbus RTU communication via RS485 allowing meter parameters to be directly measured by a computer or master device when serial communication is in place.

TIME-OF-USE
Acuvim-EL features Time-of-Use functionality allowing users to segregate energy consumption to parallel utility tariffs in up to four different tariffs schedules, 12 seasons and 14 schedules. Ideal for sub metering in areas which have TOU or are tariff-based.

KWH METERING
All of the Acuvim-L series meters feature real-time bi-directional energy monitoring for clear, economical sub metering and kWh metering across single or three-phase circuits.

VERSATILE COMMUNICATION

AXM Modules are designed for use with Acuvim II meters, expanding the communications capabilities of the core meter itself. These field-expandable modules are easy to deploy and plug directly into the meter allowing for easy installation.

I/O MODULES INCLUDE

AXM-IO1
6 digital inputs, 24Vdc power for inputs, 2 relay outputs

AXM-IO2
4 digital inputs, 2 digital outputs, 2 analog outputs

AXM-IO3
4 digital inputs, 2 relay outputs, 2 analog inputs

Expansion Protocol Support
Modbus-TCP/IP, SNMP, SMTP, SNTP, HTTP(s) Post, HTTP(s) webserver, BACnet-MS/TP, BACnet-IP, Profibus, IEC61850, Second Modbus-RTU

Expansion Interface Support
Ethernet, Wireless Mesh Network, WiFi, Cellular, Profibus

DIN-RAIL MULTI FUNCTION POWER METER

The AcuRev 1310 combines high performance with easy integration to provide a cost-effective power and energy monitoring solution. Featuring a built-in LCD, MODBUS-RTU communication, and 4 channel current input.

KEY FEATURES

- Utility Revenue Grade Accuracy - IEC 62053-22 0.5s Class / ANSI C12.20 0.5 Class.
- Multiple CT Input Options compatible with any CT: 5A/1A, 333mV, Flexible Rogowski Coil, 80/100/200mA.
- 4 Channel current input including neutral current measurement.
- Residual current measurement available.
- 10-690Vac direct voltage input, fits all voltage rating system with one model.
- RS-485 port built-in with Modbus-RTU, standard integration with most systems.
- Standard Din-rail mount for ease-of-installation.
- Compatible with both 50Hz and 60Hz systems.
- Built-in energy pulse output and alarm output.
- Optional relay output for alarm and remote control.
**4 CHANNEL CT INPUT**
Accurately measure neutral current with 4th CT and provide residual current measurement.

**AUTO PHASE-CHECK**
Designed to automatically check most common wiring mistakes such as CT direction, voltage and current phase alignment.

**SUPPORTS ALL ELECTRICAL SYSTEMS**
Three phase three wire (3P3W), three phase four wire (3P4W), single phase three wire (1P3W two element), single phase two wire (1P2W one element) and more.

THREE-PHASE POWER METER

Three-Phase power and energy meters offering a low-cost solution for reliable power metering. The EV300 series offers bi-directional energy metering with utility revenue grade accuracy in a compact panel-mountable meter.

ACCUENERGY.COM/EV300

KEY FEATURES

- Bi-directional Energy Metering.
- Utility Revenue Grade Accuracy.
- Field Configurable 5A/1A CT Input.
- Compatible with both 50Hz and 60Hz system.
- RS485 port Built-in with Modbus-RTU.
- Standard Panel Mount 96mm DIN- Direct Retrofit.
- Switch Status Monitoring and Controlling.
- Energy Pulse Output.
- 4-20mA Analog Transducer Output.
- Lowest Cost in the Same Class Guaranteed.
VOLTAGE
Measuring from 10V to 230/400V directly that works with any voltage rating system. Potential Transformer ratio configuration supported.

CURRENT
5A and 1A CT input field-configurable that suits any industrial current transformer.

FREQUENCY
Automatically adapt to 50Hz and 60Hz system without compromising the accuracy, which simplify design and eliminate international OEM frequency issues.

MULTI-CIRCUIT POWER & ENERGY METER

AcuRev 2000 is a series of multi-circuit power and energy meters that offer revenue-grade accuracy and are engineered for multi-tenant / high-density electrical metering. Offering built-in data logging capabilities, multi-tariff time-of-use functionality, power quality metering, and capacity for up to 18 single-phase circuits or 6 three-phase circuits.

KEY FEATURES

- 18 channels for 18 single phase or 6 three phase circuits.
- Revenue grade standard ANSI C12.20 class 0.5 and IEC 62053-22 class 0.5s.
- External CTs for retrofit applications.
- Optional direct current input to 80A for new installation.
- Built-in MODBUS RTU via RS485 for integration.
- Optional Ethernet communication with built-in webserver.
- Built-in data logging for historical recording.
- Over/under limit alarms for demand control.
- 4 Programmable tariff periods with 12 independent seasons, 14 schedules, and 10 year holiday configuration.
TIME-OF-USE
AcuRev 2000 series meters features Time-of-Use functionality allowing users to segregate energy consumption to parallel utility tariffs in up to four different tariffs schedules, 12 seasons and 14 schedules. Ideal for sub metering where TOU or tariff-based rates are applied for all connected individual circuits.

DATA LOGGING
All monitored parameters such as the individual branch circuit consumption and demand along with I/O integrated units can be recorded for historical data logging and analysis on the meters non-volatile memory.

POWER QUALITY
AcuRev 2020 meters provide power quality parameters such as voltage and current THD, individual voltage and current harmonics up to 31st order, voltage crest factor, current K factor, voltage and current unbalance all monitored in real time per branch circuit and available for data logging.

DC POWER & ENERGY METER

The AcuDC 240 series of DC power and energy meters are designed for monitoring DC consumption and generation in applications like renewable energy. The AcuDC 240 is a capable metering device able to read voltage, current, power, energy and ampere-hour.

KEY FEATURES

- Built-in three-line LCD display.
- Optional MODBUS RTU communications.
- Monitor and control power switches.
- Standard 72x72mm size allows for drawer type panel installation.
- Accessible with SCADA, PLC systems.
- Onboard datalogging provides historical logging of all DC metering parameters for analysis.
- Built-in hall effect sensor power supply (+/- 15Vdc) for ease of measuring with hall effect sensor.
- Optional digital input and output, analog and relay output I/O expansions.
SOLAR ARRAYS
Monitor the power and energy produced directly from the solar array before the inverter for the most accurate analysis of solar production.

VEHICLE CHARGING
Audit and observe the electrical consumption of recharging stations or individual EV motors from a charge station in real time, as an accumulated total, and with historical data logging.

WIND TURBINES
Meter the production and effectiveness of wind generated energy before being sent into the grid, and integrate with existing systems through Modbus RTU.

EASY INSTALL PANEL METER

Cut down on costly installation with these pre-configured and pre-installed panel metering systems. The AcuPanel series also features some of Accuenergy’s most powerful meters including the Acuvim II and Acuvim L series, all enclosed in either a NEMA 4 or NEMA 4X enclosure for versatile installation options.

ACUENERGY.COM/ACUPANEL

KEY FEATURES

- Factory pre-wired for fast, reliable installation.
- Factory pre-configuration eliminates meter programming on-site.
- Required accessory components are all pre-installed.
- Self-powered panel does not require separate power supply.
- Durable enclosures provide high tolerance for external force with well protection.
- Available metering options include the Acuvim II series and Acuvim L series.
- Housed in either a NEMA 4 rated industrial steel panel, or NEMA 4X rated polycarbonate panel for either indoor or outdoor implementation.

ACUENERGY.COM/ACUPANEL

ACUMESH COMPATIBLE PRODUCT
CLEAN FACTORY WIRING
Tight, reliable and tested factory installed connections and components provide for a more reliable error-free install.

COMPONENTS INCLUDED
Shorting blocks for CTs and fused terminal blocks for voltage connections pre-installed, color-coded and labelled.

PRE-CUT ENCLOSURE
Two pluggable pre-cut holes allow wires to be fed through the panel without any modification.

ADVANCED DATA ACQUISITION

The AcuLink 710 connects Accuenergy meters and third party devices to external IP-based systems. This system offers access to meter data from remote sites, real-time performance data, monitoring of peak demand and more.

Data Collection & Distribution
AcuLink collects and logs time-stamped data from connected devices, storing locally in non-volatile memory. Using an Ethernet connection you can push/pull data via a number of standard protocols.

Embedded Solution
Compact size and industrial temperature range makes the AcuLink an ideal solution for embedded applications. Effectively reducing integration time by collecting and distributing power and energy information directly.

Compatibility
Compatible with Accuenergy’s web-based energy management system solution AcuWatt EMS, and a wide range of other frontend software solution.

Installation
No software required. Data can be easily accessed via web browser. Offering an integrated meter library to help speed installation.
FEATURES, BENEFITS AND APPLICATIONS

Connect between backend meters and servers, and present information in front end.

Access energy information from local or remote sites.

View real time performance data.

Push or pull meter data to energy dashboards, kiosks and software applications.

Monitor renewable energy performance and production.

Monitor performance of critical systems such as lighting, HVAC, PDUs, inverters, etc.

Track energy use and peak demand.

Alarm notification for data points above or below target levels including SNMP Traps.

Measurement and verification (M&V).

LEED/ Energy star certification.
Wireless RS485 Network

The AcuMesh networking solution is capable of connecting RS485 enabled devices including meters, sensors, gateways, PLCs, and more, into a seamless wireless network. Offering a cost-effective non-intrusive installation requiring no additional communications wiring.

Key Features

- Devices are connected automatically on power up without configuration or software.
- Compatible with devices running any protocols via RS485 port, e.g. Modbus-RTU, BACnet, etc.
- 900MHz and 868MHz frequency band available in most countries.
- Highly secure communication with 128 bit Advanced Encryption Standard (AES).
- Advance configuration available for complex network setup with free software.
- Communicate wirelessly between meters, and any devices with RS485 running any protocol within a building or campus.
- Field upgradable firmware.
- Long-range communication: 1000 ft (305m) indoor / 4 Miles (6.5km) outdoor in a single hop.
ACUMESH WIRELESS RS485 NETWORK

The AcuMesh wireless RS485 network solution eliminates the need for RS485 communication wiring. Devices can directly connect to an AcuMesh transceiver, and the job is done. The AcuMesh transceiver transparently runs with any protocol and transmits data and commands wirelessly within a network.
CLOUD BASED EMS SOLUTION

AcuWatt is a cloud based energy management system that provides highly practical and specialty tools for energy professionals and property managers. This user friendly software offers intuitive features like real-time energy monitoring, IPMVP reporting, energy efficiency monitoring and more.

ACCUENERGY.COM/ACUWATT-EMS

FREE 6-MONTH TRIAL

With the purchase of Acuvim II and AcuRev 2000 Series or AcuLink 710.

ACUWATT EMS

ENERGY MANAGEMENT SYSTEM

KEY FEATURES

Seamless integration with Acuvim II Series three phase power meter and AcuRev 2000 series multi-channel energy meter, and all other meters via AcuLink 710 directly.

Designed for energy professionals, Energy Saving and efficiency companies facility manager and building energy managers who are looking for professional and user friendly software to get the job done effectively.

Variety of tools designed for real time energy monitoring, measurement and verification, IPMVP reporting, energy efficiency monitoring and analysis, utility meter integration, carbon footprint and cost allocation analysis.

Designed to detect energy saving opportunities, reduce energy and operational cost, and automate key analytics and reporting.

WWW.ACUENERGY.COM
DASHBOARD
Configurable widgets allow for monitoring measurements, metrics, and savings.

MEASUREMENT AND VERIFICATION
An advanced and effective alternative to conventional spreadsheets. Track energy conservation measures, calculate average consumption, and more.

TRENDING ANALYTICS
Continually learning and profiling your power usage giving users the data they need to identify irregularities.

TARIFF ANALYTICS
Offering a quick way to assess the expected savings when negotiating new energy contracts with utilities. Enter proposed tariffs and our tol calculates what you would have been paid over the past 12 months.
SIMPLICITY OF INSTALLATION

Providing the ultimate ease-of-integration this high specification line of flexible AC current transformers for power metering, power quality and general use are at their best where space is limited.

ACCUENERGY.COM/ACUCT-FLEX

KEY FEATURES

High accuracy for demanding applications.

Wide frequency range means excellent choice for harmonics and power quality.

Wide current input range 5A - 50,000A AC.

Choice of 16”, 24”, 36” or 47” length.

No additional power supply needed when used with Acuvim II Series meters.

4 STANDARD LENGTHS
We offer four lengths of coil, 16", 24", 36" and 47". Custom lengths available upon request.

WIDE CURRENT SENSING
Measure current from 5A to 50,000A on each standard coil. Higher current range available upon request.

HIGH ACCURACY & LINEARITY
Across the entire range of measurement the accuracy is 0.5%.

FLEXIBLE STYLE CT
Allows Rope-like coil to be fit into any limited space where regular CTs cannot be used.

WIDE FREQUENCY RESPONSE RANGE
Standard frequency response range 10 Hz - 20KHz. Higher frequency ranges available upon request.

STANDARD & CUSTOM OUTPUT
Multiple options of output ratio such as: 100mV/1000A, 40mV/1000A, 25mV/1000A, 10mV/1000A.
FLEXIBILITY FOR ANY SYSTEM

This plug-n-play solution can be integrated with almost any power meter and equipment. Individual CT ratios can be configured for each channel. Compatible with any single or three phase application with different current ratings.

KEY FEATURES

Seven field-configurable CT ratios: 500A, 1kA, 2.5kA, 5kA, 10kA, 25kA, 50kA.

Individual CT ratios can be configured for each channel. Works in any single phase application with different current ratings.

Works in both 50Hz and 60Hz systems.

Choice of 16″, 24″, 36″ or 47″ length.
KEY FEATURES

5A - 5000A AC current input range.
Revenue grade accuracy meets IEC 60044-1 Class 0.5s.
UL listed for XOBA UL2808 standard, CSA C22.2 No. 61010-1.
Multiple voltage or current secondary output options including 5A and 333mV.
Multiple mounting options with included accessories, and multiple window shapes and sizes available.

COMPACT SPLIT CORE MV CTS

AcuCT mV series is comprised of compact and light-weight 333mV current transformers with a split core form factor. These CTs are a cost effective solution for general panel metering applications.

KEY FEATURES

Current transformers offering a conventional split core form factor.
Safe mV secondary output.
0.5% accuracy from 10-120% of rated current.
20A - 5000A AC current input range.
UL recognized.

ACCUENERGY.COM/ACUCT-MV
KEY FEATURES

0.5% accuracy from 10%-120% of rated current.

100A to 6000A measurement range.

Industrial standard 5A secondary output.

Optional 1A output.

Accessory kits included for mounting in multiple locations.

UL recognized.
