The removal of the meter housing during the guarantee contract period causes its cancellation.

The N200 meter is destined to be installed and used in industrial electromagnetic environment conditions.

A switch or a circuit-breaker should be located near the device, easily accessible by the operator and suitably marked.

1. METER SET

Fix the meter in the panel by means of four screw holders acc. to the fig. 1. Dimensions of the panel cut-out: 92.5 x 92.5 mm dimensions. The material thickness from which the panel is made from should not exceed 15 mm.
